Futuralis

Accelerate Your Business on AWS

Whether you are on the Cloud or just looking to start your Cloud journey: gain go-to-market speed, deploy solutions at scale, optimize costs and establish a secure business environment on the world's #1 cloud service provider, AWS.

Together we build a roadmap to maximize your capabilities and grow your business to ensure you operate with:

Agility: Cloud environments enable new development and production environments to be deployed in minutes rather than weeks.

Innovation: Gain access to integrated and interoperable tools that will help you iterate faster than the competition and deliver even better customer experiences.

Security: AWS puts strong safeguards in place to help customers protect their data within the cloud, such as providing tools to support encryption and security keys to ensure data remains secure.
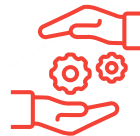

Building a Plan for the Future

Step 1: Discover
Evaluate current workloads, business needs, technology needs and technology usage patterns.

Step 2: Align
Develop a custom roadmap for growth and modernization to increase agility, innovation, and security.

Step 3: Engage
Review and finalize the strategic roadmap we will use together to accelerate and grow your business.

"Futuralis invests time in knowing our business and leads us through pivotal solutions within AWS. **They elevate our team and customer experience which encourages growth.**"
- Sarah Murphy, Partner & Creative/Web Director, Clear Mind Graphics

What Our Acceleration Plan Includes:

- **Custom cloud solution roadmap** designed to support your business growth
- **Guidance to achieve excellence** in the cloud using AWS best practice
- **Clarity on strategy** to support your future growth

According to Forrester, organizations on AWS experience benefits of $28.2 million over three years versus costs of $12 million, adding up to a **net present value of $16.2 million and an ROI of 136%**.
