

## AWS Managed Services

Dedicated support to proactively manage and optimize your AWS Infrastructure.

### Take the Complexity out of Managing your AWS Cloud Environment

Managing your cloud environment is complex, time consuming, and can distract you from running your business. Now, free your team to focus on your business with our managed services solution. Get consistent real-time tracking of infrastructure and applications with actionable insights to continuously optimize your cloud environment.

### Ensure Availability & Performance

Automated and dedicated 24/7 monitoring to keep your AWS environment running at peak performance.

### Meet Compliance & Security Standards

Customized solutions fully managed within AWS (no third-party servers) to meet compliance and security standards of any business.

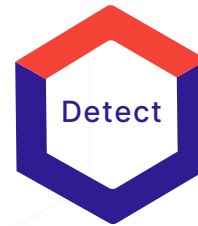

### Continuous Optimization & Innovation

Improved infrastructure and applications through actionable insights and recommendations.

### What You Receive with Futuralis

- ✓ 24/7 monitoring
- ✓ Automated notifications
- ✓ Custom metrics
- ✓ Intuitive dashboard in AWS
- ✓ Reporting with actionable insights
- ✓ Dedicated manager
- ✓ Customer support (phone & email)

### Our Approach:

#### Collect

Ongoing 24/7 data collection of your cloud environment with real time reporting on your custom metrics.

#### Detect

Automated triggers detect and alert to capacity issues, security threats and risks for rapid response.

#### Mitigate

Fast response to urgent issues and recommendations for future prevention.

**Contact us** to schedule a 30 minute introductory evaluation.
